NOTICE OF TERMINAL POND DISCHARGE - EDL-013-99

Dear Mr. Gunderson:

Rocky Mountain Remediation Services (RMRS) is providing notification to the Colorado Department of Public Health & Environment of the direct discharge of Pond A-4 at the Rocky Flats Environmental Technology Site.

Your staff collected pre-discharge samples from Pond A-4 on August 10, 1999. The Site submitted a split of the isotopic Pu/U/Am to a subcontracted laboratory for analysis, as your lab may not yet be performing these measurements. All available analytical data from both CDPHE's lab and the Site subcontracted lab indicate that water quality is acceptable. The missing gross alpha/beta, tritium, and isotopic data from CDPHE's lab will be provided when available. Direct discharge of Pond A-4 will begin on August 27, 1999, and is expected to be complete September 7, 1999.

It should be noted that the water in Pond A-4 has been 'batching' since the last discharge ended on May 18, 1999. It is likely that the discharge may be somewhat green in color as a result of the algae growth in the pond.

It is anticipated that the direct discharge from Pond A-4 will release approximately 15' MG of water. Appropriate Rocky Flats Cleanup Agreement (RFCA) compliance point sampling at GS11 (below A-4) and GS03 (Walnut Creek and Indiana Street) will be collected during the discharge, as well as the required NPDES samples for Pond A-4.
